

Theresa May Think

We Need

More Nuclear Weapons

UK Parliament will vote on Monday on renewing Trident. But the people of Scotland will not just go quietly along with Theresa May's Mad Plan to base weapons of mass destruction in Scotland for 50 more years.

But Scotland Says No More Trident

Any use of **nuclear weapons would kill millions of people.** Trident submarines carry up to 40 nuclear bombs - each of which could cause the death of a million people.

There are **17,000** nuclear weapons around the world. If 50 are used it will cause an global famine and the death of more than a Billion people. Yet the UK and other countries are planning to renew their nuclear weapons.

There is another way. Most countries don't have nuclear weapons. In fact 127 countries want a global ban. The government says it supports multilateral nuclear disarmament. But it is boycotting talks on a ban.

Email or phone your MP today to say you want Trident scrapped and a global ban.

Demonstrations in 30 towns across Scotland on 16th July.
